SUMMARY

Computer Science Engineering student with experience in Full-Stack Development, Artificial Intelligence, and Machine Learning. Skilled in Python, Java, React.js, FastAPI, JavaScript, SQL, LangChain, and REST API development, with hands-on experience building scalable web applications, AI-powered solutions, and RAG-based systems. Passionate about modern software engineering, Generative AI, and developing innovative solutions that solve real-world problems.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: FastAPI, REST APIs

AI Technologies: Machine Learning, Generative AI, RAG, LangChain, OpenAI API, Vector Embeddings, LLM Integration, Prompt Engineering

Libraries: Pandas, NumPy, Matplotlib, Seaborn, OpenCV

Databases: MySQL, PostgreSQL, ChromaDB

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Eclipse

EXPERIENCE

Star Softech

Junior Software Intern

Hubli, Karnataka

2025 – Present

- Developed responsive and reusable UI components using React.js, JavaScript, HTML5, and Tailwind CSS.
- Contributed to the development of the Aanchal Jewellery web application by implementing modern frontend features and user interfaces.
- Enhanced application responsiveness and user experience across desktop and mobile devices.
- Collaborated with developers to build scalable and maintainable web solutions following industry best practices.
- Gained hands-on experience with backend development concepts using Java and Spring Boot.
- Worked with database management concepts and software architecture fundamentals.

PROJECTS

SmartHire Enterprise – AI-Powered Recruitment Platform

- Developed a **production-ready AI-powered recruitment platform** designed to streamline end-to-end hiring workflows for recruiters and candidates.
- Implemented AI-driven resume parsing and real-time ATS/Match Score generation to automate candidate evaluation against job requirements.
- Built interactive recruiter dashboards for candidate tracking, pipeline management, talent screening, and interview scheduling.
- Designed and integrated secure REST APIs using FastAPI with JWT authentication, password encryption, and role-based access control.
- Automated interview scheduling through secure 6-digit access passcodes, email notifications, and Google Meet link generation.
- Developed a responsive glassmorphic user interface using React.js, Vite, and Tailwind CSS with analytics dashboards and data visualizations.
- Ensured scalability, maintainability, and production-readiness through modular architecture and optimized frontend-backend integration.
- Technologies: React.js, Vite, Tailwind CSS, FastAPI, Python, MySQL, JWT, Bcrypt, REST APIs, Recharts, SMTP.

NovaQuest AI – RAG-Based Document Question Answering System

- Developed an AI-powered document question-answering platform using Retrieval-Augmented Generation (RAG) to generate accurate responses from uploaded documents.
- Built a responsive React.js interface for document upload, chat-based interactions, and natural language querying.

- Developed REST APIs using FastAPI for document processing, embedding generation, and user query handling.
- Integrated LangChain and OpenAI APIs to generate context-aware responses grounded in document content.
- Implemented ChromaDB vector database for efficient storage and retrieval of document embeddings.
- Enabled users to upload PDF documents and receive relevant answers through semantic search and retrieval pipelines.
- Designed a scalable RAG architecture combining document ingestion, vector search, and LLM-powered response generation.
- Technologies: React.js, Python, FastAPI, LangChain, OpenAI API, ChromaDB, RAG, PyPDF, Vector Embeddings.

GreenClassify: Vegetable Image Classification

- Developed a CNN-based deep learning model for automated vegetable image classification using TensorFlow and Python.
- Implemented image preprocessing, feature extraction, and model training pipelines to improve prediction accuracy.
- Enhanced model performance through hyperparameter tuning, data augmentation, and dataset optimization techniques.
- Applied computer vision and deep learning concepts for image recognition and classification tasks.
- Technologies: Python, Flask, TensorFlow, CNN, Deep Learning, Computer Vision, NumPy, Pillow, HTML, CSS, JavaScript

Restaurant Recommendation System

- Developed a content-based restaurant recommendation system using TF-IDF Vectorization and Cosine Similarity to suggest similar restaurants based on user preferences.
- Performed data cleaning, preprocessing, and feature engineering on a large-scale Zomato dataset using Pandas.
- Applied text processing techniques (Bag of Words + TF-IDF) on restaurant reviews and cuisines to improve recommendation accuracy.
- Built a Flask-based web application to serve real-time recommendations through an interactive user interface.
- Generated personalized recommendations by analyzing cuisines, ratings, cost, and customer reviews.
- Technologies: Python, Flask, Scikit-learn, Pandas, TF-IDF Vectorization, Cosine Similarity, HTML, CSS.

Personal Portfolio Website

- Developed a responsive personal portfolio website using React.js to showcase projects, skills, and achievements.
- Built reusable UI components and a modern interface using Tailwind CSS.
- Ensured full responsiveness and optimized user experience across desktop and mobile devices.
- Technologies: React.js, JavaScript, Tailwind CSS, Responsive Web Design

EDUCATION

D.Y. Patil Agriculture & Technical University, Kolhapur	Maharashtra, India
<i>Bachelor of Technology in Computer Science and Engineering — CGPA: 7.6</i>	<i>Expected 2026</i>
V.N.M. Science College, Sangli	Maharashtra, India
<i>Higher Secondary Certificate (HSC) - Maharashtra State Board — 63.50%</i>	<i>2022</i>
K.N.P.V. Bhavaninagar, Sangli	Maharashtra, India
<i>Secondary School Certificate (SSC) - Maharashtra State Board — 75.60%</i>	<i>2020</i>
